FINANCIAL CRIME OUTLOOK 2026

Understanding the Environment, Governance Expectations, and Strategic Response

Programme Overview - RM4

Provide boards, audit committees, and senior leadership with a clear and current understanding of the financial crime landscape in 2026, and why fraud, corruption, scams, and enforcement trends are now core issues of governance and leadership accountability rather than operational compliance alone. The programme examines the external threat and regulatory environment, identifies key organisational exposure points and governance blind spots, and demonstrates how leadership judgement and oversight quality directly shape organisational resilience and outcomes. It equips leaders to exercise informed, forward-looking oversight and respond decisively, without reliance on hindsight or reactive governance.
